

Mentoring and Guidance in Careers workshop

for early career female or gender diverse researchers in chemistry, mathematics & physics

18 – 22 November 2019, University House, Canberra

Applications are now open and close 16 August.

The Mentoring and Guidance in Careers Workshop (MAGIC2019) is an opportunity to explore the many facets of forging a career in academic, government or industry settings, and to discuss how to create building blocks for success and resilience. Participation is limited to at most 50 early career researchers who will have the opportunity to develop a variety of skills; and to create a support network that will allow them to forge a successful career in science.

The MAGIC program involves actively interacting with your fellow participants and seeking potential collaborations. Applicants should have an ongoing commitment to making a positive contribution not only to their research but also to the broader scientific community.

To be eligible to attend MAGIC you should:

- be an early career researcher 0-7 years post PhD (excluding career interruptions)
- be female or of diverse gender identity
- have a PhD in chemistry or mathematical or physical sciences (i.e. the disciplines of chemistry, mathematics, physics and cognate disciplines)
- currently be based in Australia

Details of how to apply are on our website: <http://wp.maths.usyd.edu.au/MAGIC/>

The 2019 workshop is organised by Professors Michelle Coote (ANU), Mahananda Dasgupta (ANU) and Nalini Joshi (The University of Sydney). The organising committee includes Dr Merryn McKinnon from the Australian National Centre for Public Awareness of Science, ANU.

MAGIC2019 is supported by funding from the ARC Centre of Excellence in Future Low-Energy Electronics Technologies (FLEET), the Australian National University, the Australian Research Council, the Payne-Scott initiative of The University of Sydney, The University of Melbourne, The University of Queensland, and The University of Sydney.
